Projects completed since 2009 Assessment

Transmission projects significantly affecting system performance that have been completed since the 2009 Assessment was issued in October 2009 are listed in Table PR-1.

Most notable include:

- Construct a Jefferson-Tyrannena-Stony Brook 138-kV line,
- Rebuild/convert Conover-Plains 69-kV line to 138 kV,
- Construct second Paddock-Rockdale 345-kV line and replace 345/138-kV transformer T22 at Rockdale Substation, and
- Construct Oak Ridge-Verona 138-kV line.
